*The National Cancer Control Program (NCCP)

**To improve access to cervical cancer screening in urban and remote-rural locations, in order to achieve 80% coverage of VIA to detect cervical cancer in women aged 25-59 years

**The platform will support a data analytics model that aligns screening with age and risk

**Ethiopia’s National Cancer Control Program (NCCP)

**Specific Aims for CKD Health Disparities in African Americans

**Chronic Kidney Disease (CKD) Digital Atlas for Health Disparity Research

**To achieve 80% coverage of VIA to detect cervical cancer in women aged 25-59 years

**Specific Aims for CKD Health Disparities in African Americans

**Chronic Kidney Disease (CKD) Digital Atlas for Health Disparity Research
